The Hilltop House of God in the Garden of the Flowering Fruit Trees

## VISION

A place of community and unity, encompassing inclusion and diversity

Climbing up grassy surrounds, and approaching the central mosque through its courtyard, encapsulates a journey from the mundane to the spiritual, as the visitor - both literally and metaphorically - rises above their surroundings and leaves behind nearby motorways, dwellings, commerce and industry, to enter into, and become part of, a higher realm. This oasis of peace and serenity is, at the same time, both rooted in its local community, whilst also standing apart from it.
