

The green light means problems as well as answers. But it is time we gave the green light :  
-to more sustainable African cities  
-to a more fulfilled city population  
-the implementation of a blue economy  
-to productive and non-consumptive cities  
-to less polluted air in our African cities  
-to urban agriculture (algae cultivation)  
-to a richer and more accessible food supply for all in the city  
-to nature-inspired design
