

# BAODING MAXX BY STEIGENBERGER

LOBBY

## SITE INFORMATION

The hotel is located at No.2 building of the Shenzhen Park Venture Capital Investment Center Lianchi District, Baoding city. It is a key node plot in the start-up area of the Shenzhen Park.

## DESIGN PROPOSAL

The overall aesthetic theme of interior design is inspired by German classical music genres. We interpret the music genres as design techniques, and integrate the brand image of Maxx hotel – elaborately planned but not stick to one pattern tranquil, calm and exquisite, elegant rich layering and the balance between of comfort and drama.

1F The space design concept is based on the iconic Art Deco luxury decorative style in the 20th century and is perfectly integrated with the modern Bauhaus style. For the lobby space, we adopts curve and arch elements full of flowing feeling and lightness to create an ultimate experience with 360 degree panoramic view.

2F We use color tones with high contrast and decorative artistic elements as touches to form a cheerful non-regular space with exquisite taste. Color is changing unpredictably in the infiniteness, just like the ultimate broadmindedness in the heart, turning the moment into eternity.

3F The ceiling of the multi-function hall suspends in the air with the flow of light and shadow. The light collides with the rosy gem velvet and rich wall panel decoration to form a visual focus, perfectly interact with the space, and balance the warmth, comfort and sophistication, delicacy.
