

# MOKSHA

Seamless Regeneration in the Jungle  
BY DEZINE LOUNGE

Kithulgala, Sri Lanka.

Spacious.

The lobby is uncluttered and adorned only with a sculpture of an eagle in flight. We wished to create a spacious and open lobby to receive the guests who arrive at Moksha after a long journey cramped in a small space of a moving vehicle.

We wanted the contrast of space to give the guest a sense of relief and freedom, highlighted in the sculpture that is in direct view of the onlooker.

## Spatial.

The restaurant is open 270 degrees and affords verdant views of greens nearby and hills in the far distance. The structure encourages an open floor plan, where the guests can dine, one with nature. We used simple, unadorned wooden furniture to add to the theme of natural simplicity that runs throughout the property.

Pristine.

Is how the guest rooms were designed. We wished to retain the luxurious comfort one might experience at a star hotel, and therefore we have chosen a subtle colour palette that is comfortable to the eye, and standard designs that does not clutter the immaculate space.

Beautiful chaos however, can be found just by opening the windows. All guest rooms are east-facing and invite in the natural light and the sound of wildlife.
