

# Corner Villa

The "Corner Villa" is designed to cater to the owner's lifestyle and preferences, providing private spaces for hosting events and relaxation. The courtyard is placed at the rear, away from the parking area, while a deep balcony connects the cozy spaces to the main building. The villa's form utilizes broken and lozenge-shaped lines to create visual appeal and shadow play. Construction materials are prominently and exposedly used to design without the need for meticulous finishing. The "Corner Villa" perfectly blends lifestyle and privacy, embracing nature and human connection.
